

Reception Science Photos

In PE, we thought about what happens when we exercise. We put our hand on our chest and felt our heart beating quickly.

We like playing with the sand and realised that we can make sandcastles with wet sand but not with dry sand. We thought of words to describe how the sand felt.

We like adding water to our mixtures in the mud kitchen.

We went on a listening walk and ticked the sounds that we could hear.

We looked for signs of autumn and gathered fallen leaves.

We made a telephone and talked to each other.
