

Year 1

We have been learning about our body parts and senses this term.

We used our sense of taste to taste different flavoured crisps. We had fun guessing what flavours each crisp was. This is how we recorded our investigation:

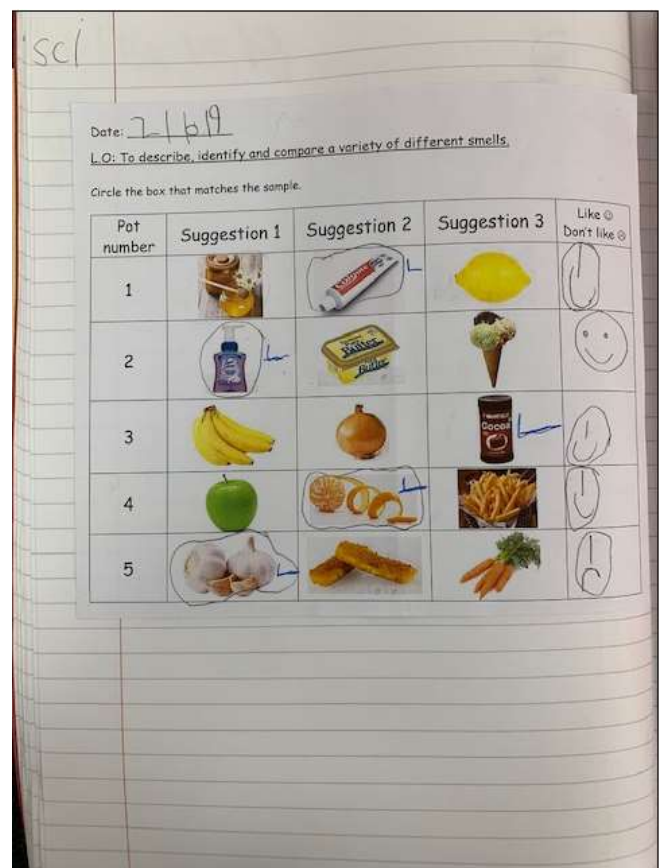

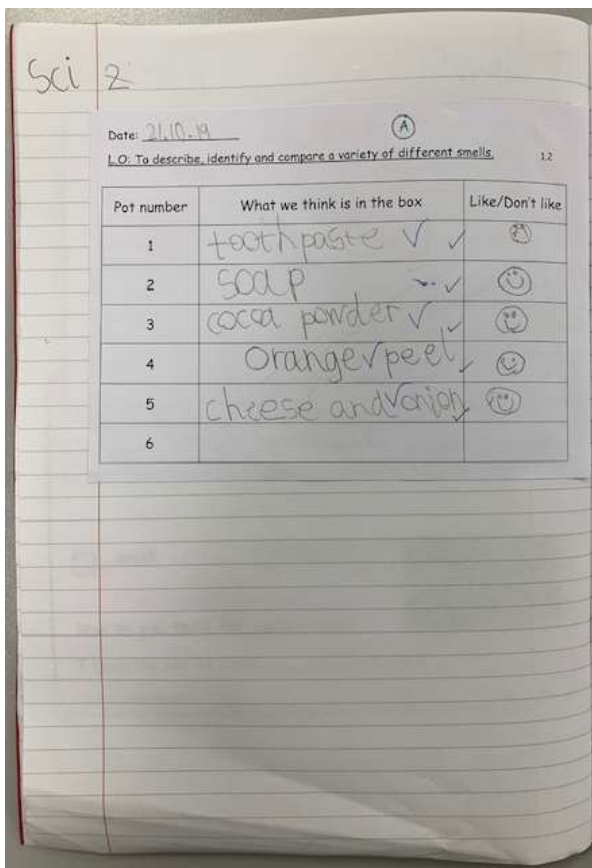

For our sense of touch lesson, we enjoyed touching some fluffy cotton wool, some rock hard stones, sticky honey and various other items!

For our sense of smell lesson, we smelt different items and identified what they were. We had lots of fun guessing. These are the different ways in which we recorded our work.

To help us with our key words each lesson, we used our science senses display board.
