

Year 6 have been learning all about Charles Darwin and his Theory of Evolution this half term. They have learned about how adaptations over millions of years have led to the plethora of life on our Earth today. More recently, Year 6 have been looking at the threats that are currently putting a wide range of animals at risk of extinction. They have discovered how detrimental noise, air and water pollution can be, leading to the bleaching of corals in our oceans and plastic clogging up our rivers. They have begun to learn about some of the things that are being done around the world to try and stop some of these threats to wildlife and have even begun to come up with some of their own.
