

States of Matter

The children made potions and experimented with solids, liquids and gases. They used the process to write a set of instructions.

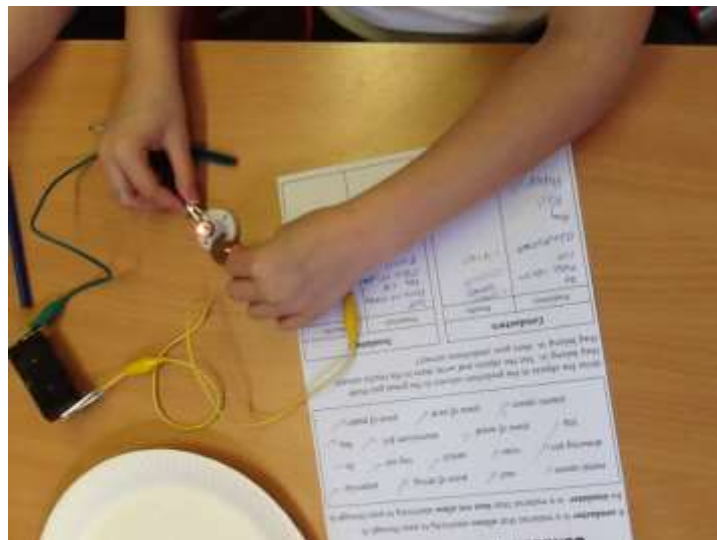

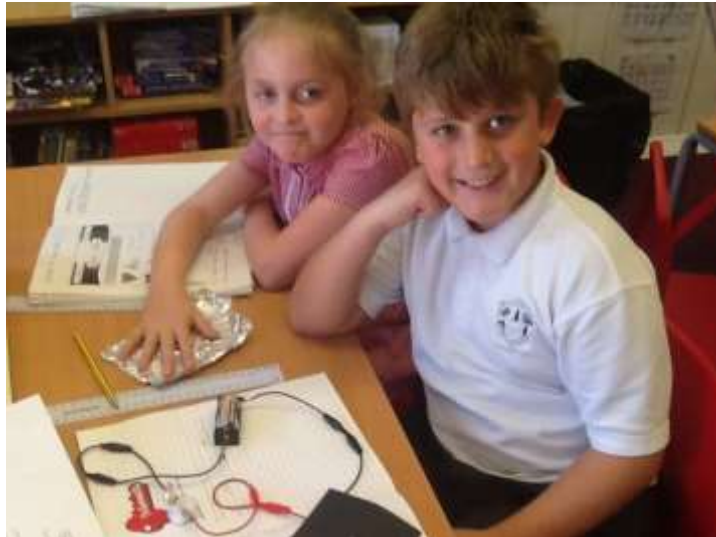

We had a special visitor in school to support us with our work on states of matter.

Electricity

They looked closely to identify the filament in a bulb.

The enjoyed building simple circuits and experimented with a range of materials to find out if they are conductors or insulators.

Animals, including humans (The digestive System)

We made posters after completing our unit of work on the digestive system.

Sound

We made earmuffs using a range of resources and we tested how effective they were at protecting our ears from loud sounds.
