

We enjoy learning outside. On our daily mile we found lots of cobwebs. Our teacher asked us, "why are the cobwebs easier to see today than on a sunny day?" "I wonder why spiders make cobwebs?"

We enjoyed watching the trees changing in the autumn. We collected fallen leaves and used them to make hedgehog pictures.

We were visited by a planetarium. We learnt about the sun and the moon and why we have day and night.

We used large cardboard boxes, torches and blankets to explore the dark. We explored how it becomes dark inside when the lid is closed and made small holes to let light in.

We were visited by scientists from William Edwards School. We learnt about magnetism and used lots of different resources to explore magnetic materials.

Making pancakes! We enjoyed mixing different ingredients together and observing the changes that occurred.

In our outdoor area, we used the cameras to take photographs of reflections in puddles.

Our trip to Chafford Gorge. We had fun pond dipping and bug hunting. We also went on a sensory walk to learn about changes in the summer time.
