

6B enjoyed having the William Edwards Science technicians come in and teach them about different parts of the body.

Tuesday 11th December 2018

Let's be able to explain the use
and use of words of features of a
poster text. (IT'S FREE)

You can
even get
paid for it!

DONATE!

67% goes to treatment
27% goes to surgery
6% goes to another
after child births

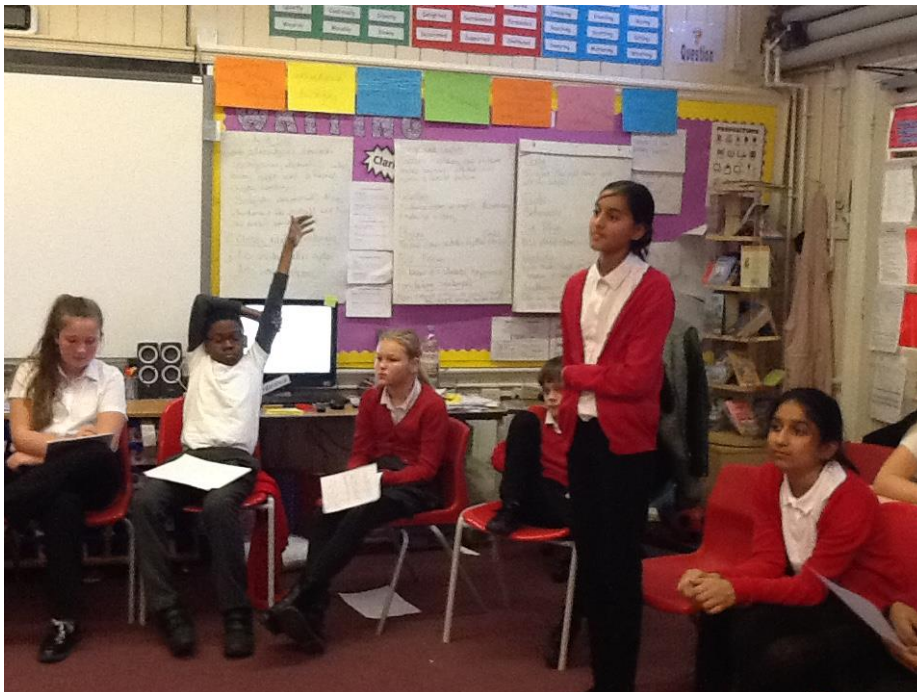

Wow!

You can save family relationships

We created posters about blood donation to try and encourage others to donate.

We combined science and art as we looked further into our topic Blood Heart. Can you see what our abstract art is supposed to represent?

This topic enabled us to have debates in the classroom and explore each other opinion.

One of our most interesting lessons was a sheep heart dissection. We were lucky enough to have Mr Stephens from Chadwell St Mary Primary school visit and perform the dissection. The children were really engaged throughout the lesson.
