

We went for an autumn walk and looked for signs of autumn in our local environment.

The girls found a seed and decided to plant it. They collected some water and poured it on top of the ground where they planted the seed.

We found a spider in the garden and carefully watched as it made a web from our coats.

After reading some stories about hedgehogs, a hedgehog arrived in class and we built it a home.

We collected fallen leaves and made autumn crowns.

We have learnt about habitats and hibernating.
